

A Label the photos with the place names and the continents below. What kind of geographical feature is each one?

Dead Sea Eisriesenwelt Galapagos Islands Great Barrier Reef Mount Erebus Mount Kilimanjaro Niagara Falls

Africa Antarctica Asia Australia Europe North America South America

B Work in groups. Your teacher will give you a continent. Choose a natural landmark on that continent, either one of the above or a different one. Research the landmark and make a leaflet giving information about it. You should include:

- the name and location of the landmark
- the kind of landmark
- a physical description
- one or two interesting facts
- the kind of activities visitors can do there.

Remember to make your leaflet attractive and include some photos and / or maps.

C Read your classmates' leaflets. Discuss the questions in your group.

- 1 What information did you find interesting or surprising?
- 2 Which landmark would you most like to visit? Why?
- 3 Which landmark would you least like to visit? Why?
